

Applications For Glass Reinforced Plastic (GRP) Products

Grating - Why Use Steel At All?

Anyone who has recently purchased a panel of steel grating will be aware of the constant price increases associated with this type of material.

The industry has attributed high prices to factors like raw material cost, strong demand in international and domestic market and high global steel prices.

Now the million dollar question – WHY USE STEEL AT ALL?

With over 40 years experience in Composites design and development Fibergrate is the world's leading manufacturer of GRP (Glass Reinforced Plastic) access products.

Fibergrate's GRP grating is now competitive with steel based on current market costs.

EXAMPLE:

GALVANISED MILD STEEL GRATING

25mm x 5mm Galvanised Mild Steel 6m x 1m sheets
= £285.00 per sheet * (£47.50 per sq. metre)

GALVANISED MILD STEEL GRATING

40mm x 5mm Galvanised Mild Steel 6m x 1m sheets
= £430.00 per sheet * (£71.66 per sq. metre)

GRP GRATING

38mm x 38mm sq. mesh Moulded GRP grating, 4m x 1m sheets = £ 197.00 per sheet

£44.75 per sq. metre

Now you can have all of the benefits associated with a composite grating for less.

* Note: Prices quoted by a leading steel grating manufacturer June 2008

Corroded Steel Grating

Moulded GRP Grating

Quick off the Shelf Delivery

Installed easier than steel

Corrosion Resistant

Lighter than steel

Superior Anti-Slip Properties

ZERO scrap value
